

Groewood House

2012 is an exciting year for us here at York Survey Supply Centre as, not only do we celebrate our 30th anniversary, but we have also expanded into a second site, Groewood House!

Groewood House is our spacious new showroom, carrying a much broader range of stock, spread across two floors, and staffed by members of our knowledgeable sales team, ready to deal with your queries!

It also houses our service and repair centre where we can maintain and calibrate instruments from all the major manufacturers and don't forget - here at York Survey, we're so committed to helping you keep your costs down that we offer the first service FREE on selected products!

This is a major investment and represents our ongoing commitment to you, our customers, to bring you the very best quality products and service, so, why not drop in for a coffee and check out our new place?
