## Plastic Rain Gauge with Memory

**Code: 33304**

## Operating Instructions

# Plastic Rain Gauge with Memory

## Operating Instructions

Position the Rain Gauge in an open area to get an accurate reading.

When the rain falls, the gauge cup will fill (up to a maximum of one litre), allowing the user to record the daily rainfall on the easy-to-read scale.

Noting the amount of rainfall on the scale, empty the contents and turn the revolving ring to indicate the amount each time that rainfall is recorded.

The rain gauge can be mounted onto a 26mm pole (pole not supplied).
